

User Acceptance Testing (UAT) Template

Date	30 September 2026
Team ID	SWTID-2026-9596
Project Name	Implement Client Script and UI Policy (Incident)
Maximum Marks	4 Marks

Project Overview:

Project Name: Implement Client Script and UI Policy (Incident)

Project Description: This project adds UI Policies and Client Scripts to the ServiceNow Incident form. The rules make fields mandatory, visible, or read-only, and show messages, so agents enter correct data.

Project Version: 1.0

Testing Period: 22 September 2026 to 30 September 2026

Testing Scope:

Features and functionalities to be tested:

- UI Policy: Configuration item mandatory for Category = Hardware
- UI Policy: Close code and Close notes when State = Resolved
- UI Policy: Caller read-only after save
- Client Script (onChange): message when Priority = 1 - Critical
- Client Script (onSubmit): Short description must have at least 10 characters User stories or requirements to be tested:
- USN-1 to USN-5 (agent stories) and FR-1, FR-2 (UI Policy and Client Script)
- NFR-1 Usability and NFR-3 Reliability

Testing Environment:

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	UI Policy makes Configuration item mandatory for Hardware	1. Open Incident > Create New 2. Select Category = Hardware 3. Leave Configuration item empty and click Submit	Configuration item is marked mandatory and the form is not saved	Configuration item was mandatory; form was not saved	Pass
Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail

TC-002	Configuration item is not mandatory for other categories (negative case)	1. Open Incident > Create New 2. Select Category = Software 3. Leave Configuration item empty and click Submit	Form is saved without Configuration item	Form was saved without Configuration item	Pass
TC-003	UI Policy shows Close code and Close notes when Resolved	1. Open an existing Incident 2. Change State to Resolved 3. Check the Resolution fields	Close code and Close notes are visible and mandatory	Both fields were visible and mandatory	Pass
TC-004	Caller is read-only after save	1. Create and save an Incident 2. Reopen the Incident 3. Try to change the Caller field	Caller field is readonly	Caller field was read-only	Pass
TC-005	onChange Client Script for Critical priority	1. Open Incident > Create New 2. Change Priority to 1 - Critical	Message to inform the Incident Manager is shown under Priority	Message was shown under Priority	Pass
TC-006	Message is removed for other priorities (negative case)	1. Set Priority to 1 - Critical 2. Change Priority to 3 - Moderate	The message is removed	The message was removed	Pass
TC-007	onSubmit Client Script blocks short Short description	1. Open Incident > Create New 2. Enter Short description = "Help" 3. Click Submit	Error message is shown and the form is not saved	Error message was shown; form was not saved	Pass
TC-008	onSubmit allows a valid Short description	1. Enter Short description with 10 or more characters 2. Click Submit	Incident is saved successfully	Incident was saved successfully	Pass

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	Critical message stayed on screen after Priority was changed back	1. Set Priority to 1 - Critical 2. Change Priority to 3 - Moderate	Low	Closed	Fixed by adding hideFieldMsg in the else part of the script
BG-002	Configuration item stayed mandatory after changing Category from Hardware to Software	1. Select Category = Hardware 2. Change Category to Software	Medium	Closed	Fixed by enabling "Reverse if false" in the UI Policy
BG-003	Rules do not work when an Incident is created from an email	1. Send an email to create an Incident 2. Open the new record	Medium	Open	Client-side rules do not run here. A Business Rule is planned

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
