

Project Development Phase
Implement Client Script and UI Policy (Incident)

Date	30 September 2026
Team ID	SWTID-2026-9596
Project Name	Implement Client Script and UI Policy (Incident)
Maximum Marks	10 Marks

Client Script and UI Policy Implementation:

Project team shall implement and test the Client Script and UI Policy configurations in the Incident form.

S.No.	Parameter	Screenshot / Values
1.	Client Script	Type: onChange Table: Incident [incident] Field: Priority Action: Execute the script when the Priority value changes. Testing: Change Priority and verify the script executes.
2.	UI Policy	Table: Incident [incident] Condition: Priority is Critical Action: Make the Short description field mandatory. Testing: Select Critical priority and verify the field becomes mandatory.
3.	UI Policy Action	Field: Short description Mandatory: True Visible: True Testing: Verify the field behavior when the UI Policy condition is true.
4.	Client Script Testing	Test the Client Script by changing the Priority field on an Incident form and verify the expected form behavior.
5.	UI Policy Testing	Test the UI Policy by selecting and changing the Priority value and verify the Short description field behavior.
6.	Incident Form Design	Verify the Incident form displays the Client Script and UI Policy behavior correctly without errors.
