

Project Development Phase
Implement Client Script and UI Policy (Incident)

Date	30 September 2026
Team ID	SWTID-2026-9596
Project Name	Implement Client Script and UI Policy (Incident)
Maximum Marks	10 Marks

Client Script and UI Policy Implementation:

Project team shall implement and test the following Client Script and UI Policy configurations in the Incident form.

S.No	Parameter	Values	Screenshot
1	Client Script	Type: onChange Table: Incident [incident] Field: Priority Action: When the selected field value changes, the Client Script validates the input and updates the Incident form accordingly. Testing: Change the Priority field and verify that the script executes correctly.	
2	UI Policy	Table: Incident [incident] Condition: Priority is Critical Actions: Make the required Incident field visible and mandatory when the condition is true. Reverse if false: Restore the field to its normal state when the condition is false. Testing: Select/deselect the condition and verify the field behavior.
